

BIOMAT USAGE

The biomat is a most powerful detoxing and healing tool in combination with Ancient Magnesium Oil and DMSO. The following tips and tricks will assist you to maximise the restoration of your health including healing cancer and bone / joint restoration.

NIGHT TIME USE

In conjunction with applying the oral and transdermal protocol place the biomat under the sheet or a wool cover and set the temperature to 30 or 35. The position of a Biomat Mini should be lined up with the buttocks and extending to the top of the shoulders.

SANDWICH

This is the most effective detox, cancer treatment and regenerative system for joint and bone restoration. I know it has consistently healed cases including cancer by infusing cells with DMSO, Magnesium chloride, Oxygen and Hydrogen. The single biomat fires 6 to 8 inches deep up into the body and the cells within range are purified and restored. The sandwich is the most powerful detoxing system because it uses a biomat on top and one underneath with twice the range of a single biomat infrared into the body. If using the biomat mini either put it side ways rolled across the stomach for treating that area or long ways if treating the Thyroid. Set the temperature from 40 to 70. The higher the better. An oxidative fire occurs when the biomat created hydrogen and oxygen finds high toxicity levels. Persevere.

HEAD TREATMENT

For migraine sufferers or autistic brain injury who have mercury and aluminium from vaccines. It can be detoxed by first drinking 30 - 50 mls of water with 5 -10 mls of DMSO with 3 to 5 mls of MAG and during the actual biomat treatment chew a half teaspoon of coconut oil so that the infrared does not demineralise the teeth. Then wrap the biomat around the head whilst laying down. Set the temperature from 40 to 70.
