

# DECALCIFICATION, DETOXIFICATION & BRAIN CLEANING PROTOCOL

Contained herein are extremely powerful protocols which are very similar to IV infusions of DMSO and ANCIENT MAGNESIUM CHLORIDE to reclaim the power of brains and literally take control of their own health destiny by addressing the major causes of brain injury, migraines, brain fog, chronic fatigue, endocrine imbalance and rapid ageing namely:

- A. **Brain toxicity** due to neurotoxic vaccine ingredients namely formaldehyde, aluminium hydroxide, aluminium phosphate, thimerosal, and polysorbate 80 (Tween-80). The protocol again uses exothermic action to deconstruct heavy metals and poisons and remove from the brain cells so it can resume normal function. The DMSO also promotes brain tissue development which brings genuine hope to people suffering from injury and toxicity.
- B. **Pasteurisation** of dairy which has hard calcium and leads to calcification (blocking) of arteries and organs misnamed plaque which stops and restricts blood supply to and deactivates the vital organs. The protocol dissolves the hard calcium from the arteries and organs to restore the blood flow and therefore they become fully functional again.
- C. **Excess oestrogen** whether it be biological or synthetic that causes fluid retention, deactivation of the hormone production system and gender disruption and a myriad of personality disorders. The protocol instigates an exothermic destructive action on contact with Oestrogen.

**Method 1 - CHEWING - Do not use due to issues with fillings becoming dislodged.**

**Method 2 - SHOT GLASS DRINKING - UPDATED ON 10/10/16**

- A. 1. Make up with 30 mils of pure water + 10 mils 99% DMSO + 5 mils of Ancient Magnesium Oil which is a total of 45 mils. This comprises 3 doses of 15mils each.
- B. 2. Drink each portion 1 hour prior to meals when the stomach is empty. Also have a dose just prior to laying down for night and have a another dose if you wake during the night.
- C. 3. **If you experience fatigue have a further dose to clean the blood effectively.**

**Method 3 - TOPICAL - UPDATED ON 28/9/16**

- A. In addition to oral method also apply Ancient magnesium oil to large areas of skin at night. Also pre & post exercise and to the face at bedtime and spray dmsso on top. Apply magnesium oil to muscle groups being used and DMSO to relieve any soreness
- B. Irritation is a sign of deficiency. Burning sensation is exothermic action on oestrogen.

Should improve sleep patterns however detoxing reactions can show as waking up with inability to resume sleep, also headaches and signs of depression. If you experience any of these, additional use of

VERSION 10

magnesium and DMSO will alleviate the symptoms. Feel free to contact Chris Savage via <http://www.cwshealing.com/contact-chris-savage.html>
