Shannon Brown Ed Chris gave me the knowledge on how to resolve a troubling uterine polyp which my Gynecologist wanted to surgically remove. With Chris' help is gone. No surgical intervention. I'd trust him with my kids health if that's any recommendations

Kris Savage Every person in Bali that got an IV benefited greatly. I recall one lady who is a friend now who had a calcified neck which caused significant pain and debilitation. Came to the treatment for general health and was shocked to find out her neck was restored. Another lady needed a hip replacement and that was restored too.
